Work Experience

Dynatrace – Product Specialist

August 2022 – Current

Product Specialists at Dynatrace utilize product and industry expertise to accelerate product adoption, drive user satisfaction, and provide strategic consulting. This includes comprehensive experience in the Dynatrace APM platform, as well as technical knowledge of cloud technologies (AWS, Azure, GCP, Kubernetes), web server technologies, server-side technologies, networking, database design, and more. Product Specialists act as SMEs of the Dynatrace platform in conversations with system administrators, site reliability engineers, DevOps engineers, developers and any IT professional who uses Dynatrace.

Dynatrace - PDP

May – August 2022

A comprehensive Dynatrace training program. Graduates of this program receive 14 weeks of training with a curriculum spanning from core APM principles to deep-dive Dynatrace technology training. In addition to technology skills, the program also focuses on Soft Skills to prepare graduates to be effective consultants on customer engagements.

Projects

Kubernetes Capstone Jul 2024 – Sep 2024	Deployment of Kubernetes application to Azure AKS. Integrated with the Dynatrace platform to showcase monitoring features.
Personal Website Jan 2024 – Nov 2024	Portfolio website designed as a web-app format to this resume, and more. Using ReactJS and hosted with Azure App Service.
Hurdle Wordle June 2022 – June 2023	Web Application used to solve the popular NY Time's "Wordle". Personal project built using Flask/Python, JavaScript, HTML, and CSS.
